

# KHUSHI CHOWDHURY

## COMPUTER SCIENCE

### PERSONAL PROFILE

I am looking for a full time position during my final year of my computer science degree.

### SOFTWARE EXPERIENCE

#### Paycheque Management System

##### *Frontend and backend developing*

- Created a front end system working on allowing user editing on command
- Added back end connection to a database system, editing the database from selected button.

#### Grade Calculator

##### *Input Output System*

- Takes in user data through front end using tkinter
- outputs the grades needed to achieve the percentage wanted by the user

### EDUCATION

#### Toronto Metropolitan University

##### *Computer Science | Sep 2021 - April 2025*

- learned the skill of quickly picking up many programming languages.
- Worked in teams to make projects in databases and software engineering methods.

#### Sir Wilfrid Laurier Collegiate Institute

##### *Ontario Secondary School Diploma | Sep 2017 - May 2021*

- Specialist High skill Major in hospitality and tourism
- Continue to tutor high school math and science after graduating.

Whitby, Ontario

### SKILLS

- Visual Studio Code, Spyder, Eclipse, Canva, Figma, tkinter and Microsoft Applications
- Linux, Bash, Eclipse, Elixir, Haskell, Rust, Smalltalk, Emacs Lisp, C#, C++, C, Java, and python
- 3D scanning, 3d printing, Fusion 360 and Ultimaker Cura

### HACHATHONS

#### WeDesignTech Hackathon

##### *Participated Twice*

1. Created a prototype for a phone extension, modelling the front end of the project.
2. Created an idea for an app that helps bikers navigate around the city.

#### Science Discovery Zone Challenge

##### *Competitive Pitching*

- The challenge was to create an improvement to the university experience.
- My team and I pitched a demo for an improved activity hub website.

#### Serenityhacks Hackathon

##### *Building and Pitching*

- Created a demo, scraping and creating an api in a team
- Made a Frontend taking in location using the google maps api
